

Berber Vinyl Back Entryway Matting

General Information

Berber entry matting is a floor covering with a specific function of scraping and storing dirt and moisture from footwear at the entrance of the building. The materials and construction of this type of floor covering are optimized to withstand high mechanical stress.

This product must be installed by professional installers that have sufficient professional liability insurance coverage (aka 'Errors and Omissions' insurance) for the project. Matter Surfaces recommends installing and maintaining entrance matting at all outdoor entrances and transitions from warehouse to office space; this will improve air quality and lengthen the life of floors.

Berber – Light Beige

Proper glides must be used on all furniture that may slide directly across the matting. Heavy objects must not be moved directly across the matting; use protective boards.

Direct sunlight can cause UV damage, such as fading, to most interior finishes. Low E glass should be selected to reduce the UV transmission to less than 1%. If Low E glass is not an option, applying 3M™ Sun Control Window Film, or similar, on the windows is recommended. Areas of the flooring subjected to direct sunlight must be shielded for two hours before, during and for a period of (72) hours after the installation.

| | |
|----------------------|----------------------------------|
| Product | Entryway matting |
| Construction | Premium hobnail pile |
| Fiber | 80% polypropylene/ 20% polyester |
| Backing | Non-staining vinyl |
| CleanZone™ Coverage | Zone 3 |
| Recommended Adhesive | MI 3500 |

| | |
|------------------|-----------------------------------|
| Roll Widths | 3', 4', 6' |
| Length | 82' |
| Total Height | 9 mm (3/8") |
| Pile Weight | 37 oz / yd ² |
| Recycled Content | 8% post industrial |
| Warranty | One Year Product Limited Warranty |

Performance

Surface Flammability ASTM D2859

Result

Passes DCO FF 1-70
